General Tree Care Objective Definitions

Clearance Prune

Remove or subordinate any branches that interfere with pedestrians, buildings or infrastructure (i.e. street signs etc). Recommended clearances are sidewalks (8'), streets (14'), side of buildings (3') and above roofs (6').

Palm Prune

Removal of any fronds hanging below 180 degrees (i.e. 9/3 on a clock). Also includes removal of any dead fronds, flower stalks or seed pods within the canopy.

Removal and Grind

Complete removal of tree. Once tree has been removed the stump will be grinded to the level that the wheel head on the grinder can reach (typically 8-12" below grade). Please note that stump grinding doesn't include grinding of surface roots, unless specified.
