

# HEALTHY TREES START WITH RESPONSIBLE CARE.

- ✔ Professional Tree Care
- ✔ Certified Arborists
- ✔ Safety-Focused Practices

Our people and talent are the heart of our company — that's our true competitive advantage.

## General Tree Care Objective Definitions

### Clearance Prune

Remove or subordinate any branches that interfere with pedestrians, buildings or infrastructure (i.e. street signs etc). Recommended clearances are sidewalks (8'), streets (14'), side of buildings (3') and above roofs (6').

### Palm Prune

Removal of any fronds hanging below 180 degrees (i.e. 9/3 on a clock). Also includes removal of any dead fronds, flower stalks or seed pods within the canopy.

### Removal

Complete removal of tree. The stump will be cut <6" to grade. (Please note that the stump will be cut as low as possible without putting the chain saw bar into the ground).

### Removal and Grind

Complete removal of tree. Once tree has been removed the stump will be grinded to the level that the wheel head on the grinder can reach (typically 8-12" below grade). Please note that stump grinding doesn't include grinding of surface roots, unless specified.

### Stump Grind

Once tree has been removed the stump will be grinded to the level that the wheel head on the grinder can reach (typically 8-12" below grade). Please note that stump grinding doesn't include grinding of surface roots, unless specified.
